

Nachhall

Meetings that resonate.

Nachhall is a self-hosted meeting intelligence platform: browser meetings are recorded, transcribed and distilled by an AI pipeline into structured knowledge – summaries, tasks, decisions and ideas, automatically filed where you will find them again.

How it works

1 · Record

Meetings right in the browser – no installs; participants join with one click via a personal invite link.

2 · Transcribe

Automatic speech recognition with speaker attribution, right after the meeting ends.

3 · Understand

Local AI models distil tasks, decisions, ideas and a summary – each with a confidence score.

4 · Retrieve

Searchable archive, per-project Kanban board, summary e-mails and PDF export.

Everything at a glance

The screenshot shows the Nachhall home screen. At the top is a navigation bar with the Nachhall logo, links to Start, Kalender, Board, Archiv, Projekte, and Personen, and a user profile for Mara Berg. The main heading is "Was nimmst du heute auf." followed by a subtitle "HALLO MARA BERG. RAUM ANLEGEN, EINLADEN, REDEN – ARTEFAKTE LANDEN IM ARCHIV." Below this is a "GEPLANTE TERMINE" section showing a meeting "Retro + Naechste Schritte" on Saturday, June 13th at 10:00, with a countdown of 21 hours and 12 minutes. Below the meeting card are buttons for "Zur Countdown-Seite", "Einladen", "Verschieben", and "Absagen". Below this is a section titled "Alles im Blick." containing four widgets: "KALENDER" showing a weekly view with a meeting on Saturday at 10:00; "ARCHIV" showing a summary of 1.5 hours of content from 2 meetings, with a circular progress indicator at 11; "BOARD" showing 4 open tasks, with 3 completed, including "Website Relaunch" and "Onboarding"; and "PROJEKTE" showing 2 projects. Below the projects widget is a "PERSONEN" section showing 3 people in the workspace.

The home screen: live rooms, scheduled meetings with countdown and all key figures at a glance.

From conversation to outcome

The screenshot displays the Nachhall web application interface. At the top, there is a navigation bar with the logo 'Nachhall' and menu items: Start, Kalender, Board, Archiv, Projekte, and Personen. On the right side of the navigation bar, there are buttons for 'demo', 'MB Mara Berg', and 'Abmelden'. Below the navigation bar, the main content area shows a meeting summary for 'Sprint-Planung Onboarding' (marked as 'fertig'). The meeting details include the date and time 'Mo · 08. Juni 2026 · 19:08–19:46' and a duration of '38 min'. There are buttons for 'Per Email teilen' and 'Als PDF'. Below the meeting details, there is a 'Projekt: Onboarding' dropdown. A red button labeled 'Meeting verwerfen' is visible. The summary is divided into two main sections: 'Zusammenfassung' and 'Tasks'. The 'Zusammenfassung' section includes the text 'Modell: demo-model' and a paragraph about the onboarding process. The 'Tasks' section lists two tasks: 'Stack-Channel anlegen' (completed by Jonas Feld 4 days ago) and 'Onboarding-Checkliste schreiben' (assigned to Lena Stein and uebermorgen).

Every meeting becomes a structured digest: summary, tasks with assignees, due dates and priority, decisions – each with the AI's confidence score.

Features

- Calendar with invitations (ICS) and one-click RSVP
- Scheduled, recurring and ad-hoc meetings
- Projects & people with their own colour and icon
- Kanban board: confirm, assign and complete tasks
- Summary e-mail to all participants
- PDF export of every meeting digest

Data sovereignty instead of cloud vendors

Nachhall runs entirely on its own infrastructure. The AI processing – summaries, tasks, decisions – is done by local language models on servers in Germany. No US-cloud meeting platform, no vendor lock-in: the data stays in-house.
